## Web Developer

Athens, Attiki, Greece · Product · Pr-100

### Description

giaola.gr is a forward-looking company that utilizes best in-class technologies (Python/Django) and managerial practices (Scrum methodology). In order to meet our increasing daily challenges we are growing our web development team!

Aside competency and professionalism, what other traits should the ideal Web developer candidate demonstrate?

- Commitment to giaola.gr goals and principles
- Ability to support and enhance the easy friendliness of our platform
- Substantial contribution to upgrading the platform in upcoming releases
- Positive and “can do” attitude

### Requirements

- BS or MSc in Computer Science
- At least 12 months previous working experience in web development
- Experience with front-end technologies – HTML5, JavaScript (jQuery, AJAX), and CSS3.
- Knowledge of Object-Oriented principles and MVC architecture.
- Knowledge of SQL and databases.
- Basic abilities in Linux including scripting (bash, sed, awk)
- Satisfactory English language skills

### Benefits

We offer a true start-up experience within an energetic and intellectually stimulating environment. Moreover, we offer:

- Attractive salary
- Fast career growth
- Interaction with highly committed and experienced professionals around all fields of expertise
- Flexible working hours
