NEUROPUBLIC ([www.neuropublic.gr](http://www.neuropublic.gr)), is an innovative Greek SME specialized in the development of integrated information systems and high-demand applications built on Cloud computing architecture. Our products and services are being successfully used by more than 800.000 end-users in agriculture, local government and healthcare. NEUROPUBLIC has been for many years one of the financially healthiest and most robust informatics companies in Greece. NEUROPUBLIC offers, among others, Smart Farming services based on spatial analytics, Internet of Things, Big Data and Remote Sensing technologies.

**TITLE (advertisement ID : PM-EU\_aueb2021)****Requirements:**

NEUROPUBLIC asks for an experienced Project Manager who will join our R&D Department in Piraeus. You will have the opportunity to be a part of a top-rated team of talented individuals with different expertise working collaboratively on common goals. You will be expected to show initiative, be flexible and take responsibility. Responsibilities include but are not limited to:

- Managing the whole lifecycle of EC funded Research and Innovation projects.
- Managing scope and writing deliverables and reports.
- Working closely with the PMO to manage financial issues.
- Coordinating with teams of specialists within and outside the company.
- Coordinating with partners and monitoring work packages on a daily basis.
- Participating in proposal writing for projects in the context of Horizon 2020, Horizon Europe and beyond.
- Preparing and delivering presentation.
- Participating in project meetings, networking events, conferences & workshops in Greece and abroad.

**Qualifications:**

- At least 3 years' experience in managing European projects, focusing especially in H2020 and LIFE funding programmes.
- BSc in Engineering / Computer Science or Agronomic Sciences.
- Fluency in English, both verbal and written.
- Experience in projects focused on Smart Farming or Digital Agriculture would be a plus.
- Experience in IT projects focused on IoT, Earth Observation and Big Data will be a plus.
- Coding experience (at least one of the following Programming Languages: Python, C++, Java, JavaScript) will be considered a significant advantage.

**Personal Characteristics and Skills:**

- Organizational skills and ability to operate in diverse and international teams.
- Excellent communication and presentation skills.
- Ability to manage internal and external partners.

- Excellent time management and crisis management.
- Availability to travel in Greece and abroad.
- Personal interest in issues related to rural development, smart farming and various agri-food topics.

Benefits:

- Competitive salary commensurate with the qualifications.
- Work in a friendly, diverse, dynamic and extroverted environment.
- Opportunity to work with innovative products that aim to transform agriculture in Greece and beyond.
- Opportunity of further training and professional development within the company.

This job position offers a competitive salary commensurate with the qualifications and the opportunity to work in a friendly, diverse and dynamic environment that promotes further training and professional development. You will have the opportunity to work on innovative products that aim to transform agriculture in Greece and beyond. Please e-mail your CV and introductory letter at [hr@neuropublic.gr](mailto:hr@neuropublic.gr) and include the word (**PM-EU\_aueb2021**) in the e-mail subject.
